

Introducing the all new **SL3300 G2** by **Renn**.

This trailer has been engineered piece by piece and is the lightest strongest trailer in the industry.

Designed to shed material, the tub is formed from a 3/16" Hardox 450 floor c/w Hardox 450 walls. It has the strength & durability to provide worry free performance for years.

The overall height of 106" provides a lower center of gravity and increased stability.

Weighing only 15,990 lbs this design optimizes the strength to weight ratio and provides the best payload in its class.

Standard with 24.5" aluminum inners & outers, Minimizer fenders and an electric roll tarp c/w 18" hoops.

General Information:

Model: SL3300GEN2 - Tridem End Dump
Top of Side Capacity: ~27.5 cu yds
Top of Boards Capacity: ~33.35 cu yds
Trailer Weight: 15,990 lbs
